

GRW PUMPS

West Bengal, India.

GRW PUMPS → CLEAR ADVICE → PROMISED QUALITY → BEST PRICES

Worthy of Industries' Trust

ABOUT US:

GRW PUMPS Pvt. Ltd. is founded by Mr. Utpal Purkait, a man of enthusiasm, having wide experience of 25 years in pump business and rocking confidence to innovate & produce quality industrial pumps at cost effective price, successfully.

Established in 2012 with a modern manufacturing unit at Domjur, West Bengal and adorable workforce of dedicated engineers, skilled workers, efficient marketing & servicing people. GRW PUMPS has grown manifolds within a short period of time to produce and cater pumps for various industries and other sectors in India and Abroad. The Company has devoted considerable efforts and resources in technological improvements to develop specialty pumps & customize every pump to get optimum performance to meet the client's variet and specific recuirements.

With perfect quality control system GRW PUMPS has been certified with various International standardisation like ISO 9001: 2015, environment management certification of ISO 14001: 2004 etc. Today the products of GRW PUMPS are sold on a Pan-India basis and in several countries around the world. The organization is flourishing with regular repeat orders for its quality & performance from different Industries.

Looking forward to the future our eternal pursuit is to satisfy customers through our all round capabilities and to build a brand "worthy of your trust".

An ISO 9001: 2015 and ISO 14001: 2004 Certified Company

OUR VISION:

To make energy efficient true value pumps of any specification of international quality and deliver to industries in India and Abroad from our own state of the art factory and become a most competent organization.

OUR MISSION:

- ► Our motto is to satisfy our esteemed customers with clear advice, quality engineering products as promised which are energy efficient and cost effective.
- ► We assure on time delivery & quick and proper after sales services of all our products.
- ► Advanced Technology such as CADD and CED etc. software are used in designing by our experienced design engineers.
- ► GRW PUMPS takes pride in being the manufacturer of some of the country's most sophisticated and specialized pumps for various core industry applications like Power generation, Steel production, Oil refinery, Public health & drinking water, Cement Industry, Food processing, Mines & Washeries, Irrigation, Waste Management system etc.
- ► The company boasts of complete set of precision testing and inspection equipment with stringent quality control activities.
- ▶ Presently we are manufacturing up to 6000 m³/hr flow capacity range of pumps.
- ▶ With continuous up-gradation of our quality infrastructural development & increased production capacity, we've started engineering and R & D activities to manufacture pumps having discharge range up to 10000 m/br innearfuture.
- ► The company also has expertise in the development of import substitution of items of larger sizes from drawing development to fitment stage.
- ▶ Retro fitment of pumps is also dome by the company. We have successfully executed and commissioned reclamation jobs of C.W. Pumps of 30000 m³/hr flow at NTPC, FSTPP, Farakka Stage 1 and 6200 m³/hr flow INGERSOLL RAND pumps at Bandel Thermal Power Plant both of which are running successfully with utmost customer satisfaction, Based on this success we have also bagged several orders from various esteemed organisation like. VISA STELLTD (70 MC) PPC PROPED (5000 m²) PMEPDC1. HTSP CESCE etc.
- ► In a short span of time the company has sold more than 4000 pumps for various applications throughout India & abroad
- ► Our Pan-India based increasing dealer network interacts very closely with the buyers from every corner of the country.
- ► From the very beginning the company is associated with many CSR programs towards social development at the factory location.

SERIES GHS

un to 10 000 m³/hr Capacity Head up to 200 mtrs Speed up to 3000 rpm

up to 80°C Temperature

MATERIALS COMBINATION CI/ 2% NICI/ CS/ SS-304/ SS-316/ Bronze/ CA6NM etc

HORIZONTAL AXIALLY SPLIT CASE PUMPS

CONSTRUCTIONAL FEATURES → Closed, Semi-open type Impeller

→ Both Horizontal & Vertical execution.

→ Bush Bearing arrangement (optional)

→ Mechanical Seal / Gland Packing

Water supply, Irrigation, Fire fighting, Mine dewatering, Steel plant, Power plant, Cooling tower, Various uses in Sugar, Paper, Petrochemical, Textile, Cement & other Plants.

SERIES GFF

up to 2000 m3/hr Capacity up to 150 mtrs Head Speed up to 3000 rpm

up to 80°C Temperature

CI/ 2% NICI/ CS/ SS-304/ SS-316/ Bronze/ CA6NM etc.

FIRE FIGHTING PUMPS

- → Axially/ Radially Split casing design
- → Single/ Multistage → Closed, Semi-open type Impeller
- → Mechanical Seal / Gland Packing

Fire fighting System.

SERIES GES

OPERATING DATA Capacity

up to 150 mtrs. Head up to 3000 rpm Speed up to 80°C Temperature

MATERIALS COMBINATION CI/ 2% NICI/ CS/ SS-304/ SS-316/ Bronze/

CA6NM etc.

up to 1000 m3/hr

VERTICAL TURBINE PUMPS

END SUCTION BACK PULLOUT PUMPS

- CONSTRUCTIONAL FEATURES → Radially Split casing design
- → Closed, Semi-open or Open type Impeller
- → ISO 2858
- → Grease Lubrication/Oil Lubrication
- → Mechanical Seal / Gland Packing

Water supply, Sprinkler system, Fire fighting, Air conditioning, Steel plant, Power station, Cooling tower, Boiler filling, & Various uses in Sugar, Paper, Petrochemical, Textile, Cement Plants & General purposes.

SERIES GRVT

up to 10,000 m³/hr Capacity Head up to 300 mtrs. up to 3000 rpm Speed Temperature

CI/ Bronze/ CS/ SS-316/ 2% NICI/ SS-316L/ CA6NM etc.

CONSTRUCTIONAL FEATURES

- Inline with Customer's requirement, pumps are manufactured with turbine/axial flow/
- mixed flow/ propeller design
- → Both Vertical hollow shaft/ solid shaft design
- → Diesel engine driven with gear box arrangement (optional)
- → Transmition bearings with cutless bearing design having outer shell of SS or brass and inner shell with natural rubber/synthetic rubber/elastomers
- → Provision of oil lubrication for handling contaminated liquid
- → Provision for external clear water lubrication
- → Delivery of liquid through column pipe to discharge pipe located above or below ground level.

Urban & rural water supply,

Irrigation,

Fire fighting. Condensate extraction,

Mine Dewatering,

Intake well,

Pipeline boosting. Various applications in Power plants, Steel plants, Refineries,

Cement and other industries.

SERIES GCP PROCESS PUMPS

Capacity

up to 750 m³/hr Head up to 140 mtrs up to 3000 rpm Speed up to 300° C Temperature

SS-304/ SS-304L/ SS-316/ SS-316L/ Bronze/ Alloy 20 etc.

- → Low NPSHR
- → Both Oil & Grease Lubrication
- → Closed/Semi-open/Open type Impeller
- → Mechanical Seal
- → Centreline mounting (optional)

Chemical industries, Petrochemical industries, Refineries, Paper plants, Steel plants, Power plant, Water/ Effluent & Sewage treatment plants, DM plants etc.

SERIES GMS

OPERATING DATA Capacity up to 500 m³/hr up to 400 mtrs. Head

up to 3000 rpm Speed Temperature up to 150°C CI/ 2% NICI/ CS/ SS-304/

SS-316/ Bronze etc.

HORIZONTAL MULTISTAGE PUMPS

CONSTRUCTIONAL FEATURES

- → Radially Split ring section type
- → Mechanical Seal / Gland Packing

Water works, Irrigation, Sprinkler installation, Mine dewatering, Boiler feed application, Hill area water supply, Fire fighting, Condensate extraction. Generation of high pressure water used in hydraulic press. Descaling plants etc.

SERIES GNC

up to 600 m³/hr up to 60 mtrs. up to 1500 rpm up to 80°C

CI/ 2% NICI/ CS/ SS/

Bronze etc.

Capacity

Temperature

Head Speed

HORIZONTAL NON-CLOG/ SEWAGE PUMPS

- → Open/ Semi-open Impeller
- → Delivery nozzle to rotate as per customer's need
- → Horizontal
- → Gland Packing

Municipal sewage station, Industrial waste water, Chemical contaminated effluents, Thermal power plants, Liquid with solid in suspension, Mine & muddy water transfer, Trade liquors, Pumping stations, Underpasses, Lifting stations, Sewage works, River pollution cleaning etc.

SERIES GMF

CI/ 2% NICI/ Bronze etc.

up to 4000 m3/hr Capacity up to 50 mtrs. head

up to 1500 rpm Speed up to 800 € Temperature MATERIALS COMBINATION

HORIZONTAL MIXED FLOW PUMPS

- → Low NPSHR
- → Back Pullout design
- → Closed/ open type Impeller → Steady flow & high efficiency

APPLICATION

Water supply. Municipal sewage station, River water inclination. Power plant, Water/ Effluent treatment & Sewage treatment plants, Barge pump station.

SERIES GSL

up to 1000 m³/hr Capacity Head up to 40 mtrs. up to 3000 rpm Speed

up to 80°C Temperature

NI- HARD/High Cr. Alloy CI

HORIZONTAL SLURRY PUMPS

- End suction top discharge back pullout design → Front pullout design (optional)
- → Expeller ring type design
- → Adjustment of impeller on front and back side
- → Twin Casing Design (optional).

Mining & mineral processing, Highly abrasive slurries, Dredging & Trailings, Cyclone feed, Industrial processing, Coal & Power plant ash handling, Pulp & paper/ Lime slurry/ Alumina/Fertilizer/ Magnetic pulp/ Ferro silicon pulp/ Sand & gravel water mixtures etc.

SERIES GMB

OPERATING DATA Capacity

up to 130 m³/hr Head up to 70 mtrs Speed up to 3000 rpm up to 80° C Temperature

MATERIALS COMBINATION CI/ Bronze/ SS etc.

HORIZONTAL MONOBLOCK PUMPS

CONSTRUCTIONAL FEATURES

→ Mechanical Seal

Water circulation in cooling tower, Office & shopping complex cooling system,

Construction sites. Hotels, Dairies, Hospitals, High rise buildings.

Agricultural. Industrial applications.

SERIES GSP

Capacity up to 300 m³/hr head up to 35 mtrs. up to 3000 rpm Speed Temperature up to 80°C

CI/2% NICI/ SS/

HORIZONTAL SELF-PRIMING NON-CLOG PUMPS

→ Engine driven (optional)

→ Mechanical Seal (optional).

Municipal services, Construction sites, Handling ash water, Tiles, Marbles, Filter press etc., Civil construction, Public utilities in sewage pumping, Marine in pumping water from docks, ports, vessels, Mobile machinery in cooling water for marine engine & solvents and Various industries in Effluent nlante

SERIES GVIL

OPERATING DATA

Bronze etc.

up to 60 m³/hr Capacity Head up to 200 mtrs. up to 3000 rpm Speed

Temperature up to 80°C

MATERIALS COMBINATION CT/SS-304/SS-316Letc

VERTICAL INLINE MULTISTAGE PUMPS

CONSTRUCTIONAL FEATURES

Vertical Single impeller multistage ring section design.

→ with inline suction & delivery

→ Inbuilt type motor having IE2/ IE3 features

→ Mechanical Seal design

→ Min. floor space with minimum foundation cost

Water supply, Sprinkler system, Fire fighting, Irrigation, Pressure boosting duties for warm, hot & cooling water re-circulation and condensate transport, Boiler feed circuits, Washing plants, Filter

VERTICAL SUMP PUMPS

up to 250 m³/hr Capacity Head up to 40 mtrs.

Speed up to 3000 rpm up to 80°C Temperature

CI/ CS/ Alloy steel/ CF8/ CF8M/ NI-HARD/ Rubber line etc.

system. Domestic water supply system.

- → Shaft Sealing with Gland Packing or Mechanical Seal
- → Pump Setting depth upto 5 mtr.
- Special bearing support and lubrication arrangement

Effluent treatment plants, Sewage Pumping stations, Handling of raw & unscreened sewage in chemical plants. Industrial waste water, Contaminated effluents, Rain & Turbid water from trench/ tunnel/ pit etc.

SERIES GDWS

OPERATING DATA Capacity

up to 1000 m³/hr up to 150 mtrs Head Speed up to 3000 rpm up to 80°C Temperature Solid sizes up to 50mm

MATERIALS COMBINATION Alluminium alloy/ CI/ CS/ SS/

Bronze etc.

CONSTRUCTIONAL FEATURES

- Both Single phase & Three phase (up to limited flow),
- Float arrangement and Agitator arrangement (optional).
- Provision for seal protection, winding protection, Bearing protection and Moisture sensor protection (optional).
- → Auto-coupling arrangement & Cutter arrangement

Water dewatering at construction site/ residential & commercial basement, Underground utilities, Mining, Quarries, Tunneling, Flood relief, Dry dock/ off shore, Power/ Steel plant, Removal of kitchen waste, Cleaning of manholes/ trenches, Removes all sorts of industrial waste, pumping from lower tank to upper tank.

DEWATERING SUBMERSIBLE PUMPS

SERIES GSS

Capacity up to 1000 m³/hr Head up to 50 mtrs. Conned up to 3000 rpm

Solid sizes CI/ CS/ SS/ NI-HARD

up to 50°C Temperature up to 100 mm

SEWAGE SUBMERSIBLE SLUDGE PUMPS

- Impeller type of votex Grinder Semi-open/open channel.
- → Provision for Agitator (optional)
- Fixed/ guide rail type installation (optional)
- -> Thermal motor protection, Moisture detection → Provision for seal protection, winding protection, Bearing protection and Moisture sensor protection optional,

Sewage system, Flood & Pollution control, Industrial effluent. Waste water treatment plants, Municipal sewage pumping stations, Transfer water/ slurries with abrasive solids, Steel & Cement industries, Mine & muddy water transfer.

SERIES GBS

Capacity up to 400 m³/hr up to 300 mtrs bead Speed up to 3000 rpm up to 500 C Temperature

MATERIALS COMBINATION CI/ SS/ Bronze etc.

VERTICAL BOREWELL SUBMERSIBLE PUMPS

- CONSTRUCTIONAL FEATURES
- Pump can withstand voltage variation between +10-15% volt
- 550 volt can be provided

APPLICATION

Drinking water supply, Industrial water supply, Irrigation, Farm house, General water supply etc.

SERIES GOS

Capacity up to 300 m³/hr Head up to 200 mtrs. up to 2900 rpm Speed Temperature up to 50°C Supply Voltage 415 V, 50 Hz

Casing/Impeller/Motor Body: Cast Iron. Shaft: SS-410, Oil Seal: Rubber, Bush : Gun Metal.

Thrust Bearing : SS/ Carbon. Rotor: Copper Rotor

OPENWELL SUBMERSIBLE PUMPS

- → Wet type water lubricated & coated bearings and PVC insulated
- Can operate up to 15 starts per hour
- → Pump can withstand voltage variation between +6% and -15%
- → Rotor & Impellers are dynamically balanced for long life

→ Both Single phase & Three phase

APPLICATION

Water pumping from wells, sumps, ponds, lakes and rivers, Cooling water circulation, Water supply to municipalities, panchayats & hilly terrains, Sprinkler, dip & rain gun irrigation, Fire fighting, Clear water sewage pumping,

Steel plants, Power plants, Fertilizer plants & similar industries, Oil

lubricating oil etc., Chemical industries handling mixed chemicals, plastic, paint & ink, and Dairies, Breweries handling fruit juices.

SERIES GGP

OPERATING DATA

Capacity up to 150 m3/hr Pressure up to 12 kg/cm² Speed up to 3000 rpm up to 110°C Temperature

MATERIALS COMBINATION

CI/ CS/ SS-304/ SS-316 etc.

Viscosity

GEAR PUMPS

CONSTRUCTIONAL FEATURES

- → Floating geared design enable uniform load distribution
- → Specialized design tooth profile increases the tooth life

transfer, Transferring tar, pitch, crude, diesel oil, furnace

- → Mechanical seal (optional)
- → Both internal & external gear construction

SERIES GSC

up to 50,000 cst

SCREW PUMPS

Capacity up to 200 m³/hr up to 45 bar Pressure Speed up to 3000 rpm Temperature up to 150°C Viscosity up to 30,000 cst

Solid handling up to 5%

Body : CI/ Bronze/ SS Screw: SS/ Bronze/ Alloy steel

- Self-Priming feature → Non-clogging feature

vegetable fats & oils, molasses etc.

- Low NPSH resulting capability of high suction lift Drive arrangement shall be electric motor,
- geared motor, gear box arrangement, V-belt drive

Refineries, Petroleum depots, Steel & Power plants, Fertilizer plants, Captive Diesel Power plants, Handling Acrylic Emulsion, Ceramics, Paints, Printing ink, Cosmetics, Liquid soaps, Jam, Fruit pulp, Cream, Medical formulation, Chocolate mix, Yeast, Magma, Molasses etc.

SERIES GRC

Capacity up to 100 m³/hr Pressure up to 500 kg/cm² Temperature up to 150°C up to 30,000 cst Viscosity .

Solid handling up to 5%

Body : CI Piston : SS/ Cast steel

RECIPROCATING PUMPS

- Super hard. Non-scoring plungers
- → Several interchangeable plunger and seal packages

- High pressure water blasting/ cleaning/ cutting/ metal descaling,
- Hydraulic charge/ Hydrostatic test,
- Chemical processing
- Seawater reverse osmosis.
- Refineries. Oil and gas industries etc.

SERIES GNM

up to 80°C

OPERATING DATA Capacity up to 300 m³/hr Head up to 80 mtrs. up to 3000 rpm Speed

MATERIALS COMBINATION

Temperature

Polypropylene/ PVDF/ PTFF/ HDPE/ UHMWPE

NON-METALIC CENTRIFUGAL PUMPS

CONSTRUCTIONAL FEATURES

- → End suction top discharge back pullout design
- Self-priming type pump with priming pot (optional)
- → Vertical type pump with 3 mtr suspension length can be provided
- Monoblock configured pump can be provided → Hardwares & fasteners are encapsulated to avoid
- environmental corrosion
- → Mechanical seal arrangement is also provided

APPLICATION

Highly corrosive liquids like HCL, H2SO4, HNO3 etc., Filter press for dyes & pigments, Descaling, Water & effluent treatment, DM water transfer, Electroplating, Pickling of steel in cold rolling mills. Food and Pharmaceuticals etc.

SERIES GHP

Capacity up to 500 m³/hr up to 120 mtrs. Head Speed up to 2900 rpm up to 80°C Temperature Supply Voltage 415 V. 50 Hz

Impeller CL / SS

Suction & Discharge casing CI/ Stainless Steel

Sealing Gland packed/ Mechanical seal

HYDROPNEUMATIC SYSTEM

- → Pump supplied with Control Panel with fixed speed and variable speed as per customer's requirement
- Skid mounted complete system comprising suction & discharge manifold, valves, pressure switch, pressure transmitter along with hydropneumatic tanks etc. as per above picture & as per customer's requirement
- → Both horizontal & vertical pump can be provided in system

Hotels

Residential buildings. Hospital buildings, es.

Various utility servic

COUPLING

Flexible Pin & Bush/ Flexible Type/ Spacer (Jaw Flex/Rubber Pad)/ Metaflex

RECLAMATION / RETROFIT / **UPGRADATION OF PUMPS:**

RECLAMATION / RETROFIT / UPGRADATION STEPS

STEP 1 SITE ANALYSIS & MONITORING OF

EXISTING PARAMETERS

STEP 2 DATA COLLECTION

STEP 3 ASSESSMENT OF DAMAGED PARTS

STEP 4

RECOMMEND ENGINEERING SOLUTION

STEP 5 DESIGN & DEVELOPMENT

STEP 7

PRIMARY OBJECTIVES:

- → To obtain optimum efficiency as per existing system.
- Maintaining similar parameters with a little or no alteration to suit the existing data.
- To provide cost effective and time frame services, re-use of existing spare parts as far as possible.
- Maintaining minimum modification (if requied at all) in base foundation, piping layout, internal parts and mating faces to suit the existing system.
- Aim to reduce the vibration parameters as far as possible.
- → To design effective hydraulic parameters to match overall performance of the system.
- → To make spare parts easily available.

WE ALSO UNDERTAKE IMPORT SUBSTITUTION OF PUMPS AND ONE TO ONE REPLACEMENT OF **OBSOLETE MODEL & MAKE PUMPS AND SPARES**

WE ARE ALSO IN GLOBAL MAP
